

KiNVO Emergency Alerts

KiNVO's emergency alert functionality allows districts to communicate critical information like school closures, urgent news, and inclement weather to all parents and staff members in real-time.

- Instant delivery via text message means you'll reach the most stakeholders
- A one-way, no-reply communications path eliminates the need to manage responses
- Send school-wide or district-wide to make sure recipients stay in the know
- Deliver alerts to teachers, parents, or both groups concurrently to reduce administrative burden

Deliverability assurance

Many districts struggle with maintaining accurate parent contact info. KiNVO's deliverability assurance page shows which parents received an emergency alert, and which ones need to hear from you another way.

- View deliverability rates
- Download deliverability report to see receipt and opt-out rates
- Maintain a record of all emergency alerts, recipient lists, and date/time stamps
